For Walls, Ceilings and Furniture  
100% Hoop Pine

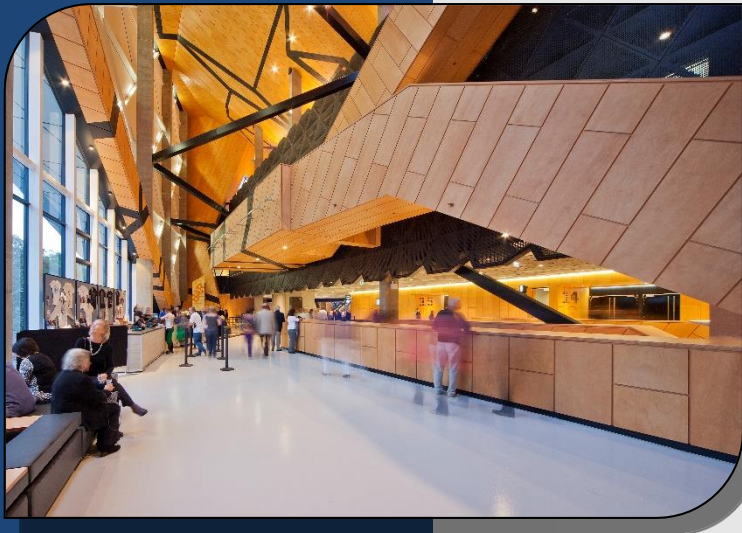

Responsible  
Wood  
RW/1-31-35

PRODUCT CERTIFIED

JAS-ANZ

**Austral Interior provides the best Hoop Pine finish available on the market today.**

**Premium quality panel**

Austral Interior is a premium quality plywood panel designed for walls, ceilings and furniture applications.

**White glue system**

Unlike most other plywood available, Austral Interior is manufactured with a white glue system, providing a clean and bright finish that enhances the beautiful Hoop Pine appearance.

**100% Hoop Pine**

Austral Interior is a 100% Hoop Pine plywood panel, sourced from sustainable and renewable plantations in Southeast Queensland. Austral Interior is RW/PEFC Certified.

**Grades available to suit your project**

- **Premium AC** is our premium grade. The face is typically consistent and uniform, and exhibits a warm, wood appearance.
- **Natural BB** presents a more natural appearance, using faces that exhibit natural characteristics. These include more swirling grain, colour variation and filled splits.

**Acoustic options available**

Perforations and slots are available in a number of patterns, providing a finish that is both functional and decorative.

**Austral Door Panel**

For free standing cabinetry doors, Austral Door Panel is recommended to minimise the possibility of warping. Austral Door Panel is a Hoop Pine veneered MDF board, enhancing flatness yet retaining the beautiful Hoop Pine look and feel.

For projects requiring the appearance of a full plywood panel, Austral Multiply 1mm edging is also available, making the panel indistinguishable from a regular plywood board.
