Standard	AS/NZS 2269 - 2004

### Enjoy the warmth of a wooden floor

Austral Plywoods offer a Hoop Pine plywood flooring suitable for clear finishing. The face veneer is a selected "A" grade 2.5mm Hoop Pine veneer. The plywood is manufactured to the AS/NZS 2269-2004 standard and complies with the EWPAA-JAS-ANZ Quality Control Programme.

Hoop Pine flooring has superior strength and stiffness relative to weight, and is easily installed by one person. This enables the floor to be laid efficiently and is very cost effective for those looking for the comfortable feel of a natural plywood floor.

Polish Grade Flooring - City Beach store, Brisbane

Flooring can be supplied either tongue and grooved, as used in a traditional floor, or square edge for stair treads.

Please note: Do not use appearance grade plywood flooring as a platform during construction. If exposed to the weather, checking of the face will occur. For best results the floor should be laid just prior to finishing.
