

Product Quality Certification

Austral Plywoods manufactures to Australian/New Zealand plywood standards, and complies with the [Engineered Wood Products Association of Australasia](#) Quality Control Programme and Product Certification Scheme. This quality system is accredited by the Joint Accreditation System - Australia and New Zealand (JAS-ANZ) as a product certification programme. JAS-ANZ is the peak accreditation body in Australia and New Zealand established under treaty by the governments of both countries.

It is significant that products certified under a JAS-ANZ accredited programme are automatically deemed to satisfy the product certification requirements of the Building Code of Australia. Additionally JAS-ANZ accredited product certification satisfies the acceptance requirements of State and Commonwealth Government purchasing authorities. Efforts will continue to have the JAS-ANZ product certification programme recognised by Australia's international trading partners. JAS-ANZ accreditation adds further credibility to the already well accepted [EWPAA Brand Stamps](#).

The JAS-ANZ accredited EWPAA Quality Control Programme and Product Certification Scheme is a sophisticated programme structured to meet the requirements specified in the International Organisation for Standardisation (ISO) Document, Assessment and Verification of Conformity to Standards and Technical Specifications - System No. 5.
